

Welcome to the National Sailing Center & Hall of Fame's Education Site

The National Sailing Center & Hall of Fame is a non-profit educational institution. Our goal is to bring together educators from across the country to share resources and to use our website to provide virtual displays for learners of all ages. Our national consortium of organizations and individuals using sailing to teach math and science is only one example. We have also created an Education Advisory Council comprised of experts in mathematics and the sciences, sailing professionals and educators.

This section of the website is constantly evolving - we will be adding to and enhancing these pages often, so please check back whenever you're looking for a way to incorporate Sailing into your teaching objectives.

Learning Math & Science Through Sailing NSHOF Education Programs

The National Sailing Center & Hall Fame has organized a national consortium of organizations and individuals

Featured Presentation: Sailing AS History

Thomas G. Sitzmann has created an insightful presentation linking the history of sailing with the development of pretty much all scientific breakthroughs of the last four centuries. It's an inspirational powerpoint video that gets you thinking differently about history, science and technology, and it all revolves around our ability to sail 'round the world. Click on the picture or [click here to play his presentation](#)
